About Maldives

The Maldives, a tropical paradise of pristine beaches, are an archipelago of 1,192 coral islands grouped into 26 coral atolls (192 inhabited islands, plus 166 islands with tourist resorts) in the Indian Ocean. They lie south-southwest of India and are considered part of Southern Asia.

Several palm trees are silhouetted against the sky, and their reflections are visible in the calm water. In the foreground, there are lounge chairs on the beach, also reflected in the water.

What to do in Maldives

The Maldives is renowned for its incredible diving opportunities. The crystal clear water and shallow lagoons are perfect for snorkelling, while the reef walls offer a kaleidoscope of sea life for more experienced divers. The Maldives have an amazing diversity of sea life, with corals and over 2000 species of fish, ranging from reef fish and reef sharks to moray eels, rays and whale sharks. The island's many sheltered lagoons also provide the perfect destination to enjoy an adventure-filled family holiday or romantic getaway for two.

Tourism in Maldives

Tourism is the largest economic industry in the Maldives. A tourist resort in the Maldives consists of an exclusive hotel on its own island, with its population entirely based on tourists and work force, with no local people or houses. These islands developed for tourism are approximately 800 by 200 metres in size and are composed of sand and coral to a maximum height of about 2 metres above the sea. In addition to its beach encircling the island, each island has its own "house reef" which serves as a coral garden and natural aquarium for scuba divers and snorkelers. The shallow water enclosed by the house reef also serves as a large natural swimming pool and protects swimmers from the ocean waves and strong tidal currents outside the house reef.
